

CLASSIFIED is active in the development and production of drivetrain technology for sports bicycles (race, gravel, TT and MTB) and E-bikes. CLASSIFIED has broad expertise in drivetrain technology and creates state-of-the-art innovative products. CLASSIFIED focuses on the complete development of its new products: as from market and patent research, through proof of concepts and prototypes, up to series production.

CLASSIFIED has developed a revolutionary drivetrain product for the sports bicycle industry, in particular for the gravel, road, TT & mountainbike segment, and is looking to reinforce its team.

CLASSIFIED offers you the unique opportunity to be closely involved in the launch of its new product, as well as the development of its other new products. And, it's a one-of-a-kind opportunity to exploit and/or further develop your entrepreneurship in doing so. You will engage in a fast growing team with a dynamic environment and experienced team members.

Production Manager – location Turnhout (BE)

Your function:

As Production Manager, you will be responsible for the production and assembly of CLASSIFIED's products and components.

We are looking for a highly motivated & motivating Production Manager to lead and manage our production team in Turnhout. You will oversee multiple areas and focus on the highest level of quality. You will develop and support your team through strong collaboration and communication. You will support CLASSIFIED's mission to produce innovative, high-quality products.

Your responsibilities

- You will be responsible for the production and assembly of our bicycle products and components
- You will develop, build and manage a team focused on consistently delivering high-quality products
- You will create a culture centralized around quality, based on communication & accountability
- You will facilitate the production team to communicate with R&D to improve manufacturability & quality
- You will support continuous improvement & learning
- You will make sure the production team uses standardized work processes & practices
- You will report key issues and resolution suggestions to management

Your profile:

- You have a degree and experience (at least 5 years) in a high-volume production (assembly) environment
- Knowledge of mechanical subassemblies (incl. tolerances) and (mechatronic) assembly processes
- Excellent organization skills with attention to detail & quality
- Strong communication skills
- You are very hands on & results-oriented
- You are fluent in English

Personal characteristics:

- You are a positive team player with a strong hands-on mentality, and you enjoy a scale up mentality
- You are keen on taking up the challenge to bring new products to the market
- You are positive, thorough, accurate, result-oriented and have an eye for detail and quality
- You are organised and well documented
- Being a cyclist is not a must, but definitely a pro!

What do we offer?

- A challenging position in a young, dynamic company in a highly evolving market
- Being able to work on products that will revolutionize the sports bicycle & e-bike industry
- A professional team of highly motivated people in a flexible environment
- A flat organization with a start-up culture and essential communication lines
- Competitive working conditions and compensation

We are looking for a permanent team member: we invest in our collaborators and wish to establish a long-term relationship.

Are you interested?
