

**CLASSIFIED** is active in the development and production of drivetrain technology for sports bicycles (race, gravel, TT and MTB) and E-bikes. CLASSIFIED has broad expertise in drivetrain technology and creates state-of-the-art innovative products. CLASSIFIED focuses on the complete development of its new products: as from market and patent research, through proof of concepts and prototypes, up to series production.

CLASSIFIED has developed a revolutionary drivetrain product for the sports bicycle industry, in particular for the gravel, road, TT & mountainbike segment, and is looking to reinforce its team.

CLASSIFIED offers you the unique opportunity to be closely involved in the launch of its new product, as well as the development of its other new products. And, it's a one-of-a-kind opportunity to exploit and/or further develop your entrepreneurship in doing so. You will engage in a fast growing team with a dynamic environment and experienced team members.

## Supply Chain Manager – location Turnhout (BE)

### Your function:

As Supply Chain Manager, you will be responsible for the supply chain, sourcing and manufacturing development of our bicycle products and components.

We are looking for a highly skilled and motivated Supply Chain Manager to develop, negotiate and manage new and existing suppliers and manufacturing partners. You will be active in the development, implementation and management of strategies to provide optimal supply assurance, pricing, flexibility, quality and delivery performance. You will build and maintain strong relationships with key suppliers and partners to make sure cost, quality, and delivery targets are met. CLASSIFIED is a fast growing, dynamic company where flexibility is a key attribute for success.

### Your responsibilities

- You will be responsible for the development, management and negotiations with new and existing suppliers & manufacturing partners
- You will develop, manage and execute cost-down strategies and cost reduction programs
- You will oversee end-to-end planning (material planning, clear-to-build, inventory control, logistics, etc.)
- You will organize and structure communication with new or existing suppliers & manufacturing partners
- You will develop and implement KPI's with suppliers & partners
- You will report key issues and resolution suggestions to management

### Your profile:

- You have a degree, and experience (at least 5 years) in supply chain in a (global) production environment
- Knowledge of mechanical subassemblies (incl. tolerances) and production processes (eg. metal injection moulding, sintering, CNC, plastics, etc.)
- You have strong communication skills
- You are very hands on, results-oriented and able to work autonomously
- You are fluent in English

### Personal characteristics:

- You are a team player with a strong hands-on mentality
- You are keen on taking up the challenge to bring new products to the market
- You have a problem-solving approach and you enjoy a scale up mentality
- You are positive, thorough, accurate, result-oriented and have an eye for detail and quality
- You are organised and well documented

- Being a cyclist is not a must, but definitely a pro!

## **What do we offer?**

- A challenging position in a young, dynamic company in a highly evolving market
- Being able to work on products that will revolutionize the sports bicycle & e-bike industry
- A professional team of highly motivated people in a flexible environment
- A flat organization with a start-up culture and essential communication lines
- Competitive working conditions and compensation

We are looking for a permanent team member: we invest in our collaborators and wish to establish a long-term relationship.

## **Are you interested?**
